ABOUT ME

Final-year Software Engineering student (graduating January 2026) with hands-on experience building full-stack web applications using Vue.js, React, Next.js, Node.js, Express, Laravel, MongoDB, and MySQL. Passionate about developing scalable, real-time systems and delivering practical projects through internships and academic work.

EXPERIENCE

Frontend Developer Intern

Institute of Banking and Finance (IBF)   6 months

Developed an internal e-learning platform using Vue.js and Quasar, integrating REST APIs, building reusable UI components, and collaborating closely with backend developers to ensure smooth data flow.

Backend Developer Intern

Institute of Technology of Cambodia (CyberLab)   3 months

Developed a web-based inventory system using Laravel, Filament, and MySQL with role-based access control and real-time stock management across multiple branches.

PROJECTS

Video Interview Platform

Built a real-time video interview platform using Next.js with secure authentication, live video/audio calling, and a responsive UI powered by Stream Video SDK, Clerk, Convex, Tailwind CSS, and shadcn/ui.

Mern E-commerce platform

Built a full-stack e-commerce application using React and Express with MongoDB, Redis caching, Stripe payments, Cloudinary image uploads, JWT authentication, and a responsive UI.

Stock Management System

Developed a web-based inventory management system using Laravel, Filament, and MySQL with role-based access control and real-time stock tracking across branches.

E-learning System

Developed the frontend of an e-learning system using Vue.js and Quasar during an internship, contributing to page development, custom video/audio components, and hands-on project work.
